D365 F&O Functional Consultant | Manufacturing & Supply Chain

INDEPENDENT CONSULTANT PROFILE • PARTNER SUBCONTRACTING

FUNCTIONAL CONSULTANT SUMMARY

ERP Analyst and independent consulting practitioner with hands-on experience supporting Microsoft Dynamics 365 Finance & Operations in manufacturing and supply chain environments. Brings business-process knowledge, troubleshooting discipline, data analysis, and clear end-user communication to focused project assignments.

FUNCTIONAL EXPERTISE

- D365 F&O: production orders, manufacturing execution/PFE, routes, scheduling, MRP, inventory, warehouse operations, quality, purchasing, and intercompany processes.
- Operational analysis: issue triage, root-cause investigation, user acceptance testing, workflow documentation, and training.
- Analytics & automation: Power BI, SQL reporting, Power Automate, SharePoint workflows, and enterprise integration support.

REPRESENTATIVE ENGAGEMENTS AND EXPERIENCE

- Developed production-status reporting concepts connecting manufacturing execution, route milestones, and quality wait-time visibility.
- Supported PFE adoption through process documentation, training, and operational troubleshooting.
- Investigated D365 MRP, production scheduling, return-order, inventory, and intercompany transaction issues.
- Built or supported Power BI reporting, SQL-based analysis, and workflow automation for recurring operational needs.

WHERE I SUPPORT MICROSOFT PARTNERS

- Supplemental D365 Finance & Supply Chain functional capacity for scoped projects and post-go-live support.
- Manufacturing/supply chain SME input for discovery, requirements, UAT, and operational process improvement.
- Reporting, documentation, knowledge transfer, and end-user enablement.

ENGAGEMENT PREFERENCES

Remote-first • Part-time / scheduled availability • Scoped assignments • Direct engagement or approved subcontracting arrangements
